

Muhammad Dhiyaul Atha

Open Source Maintainer | DevOps & Backend | Linux | Cloud Native

Nagan Raya, Nanggroe Aceh Darussalam, Indonesia | mdhyaulatha@gmail.com | LinkedIn: www.linkedin.com/in/muhammad-dhyaul-atha | Portfolio: mdhyaulatha.me

PROFESSIONAL SUMMARY

Informatics Engineering student and Open Source Maintainer interested in Linux, backend development, DevOps, and cloud-native technologies. Experienced in building and maintaining open-source Linux tools, CLI applications, backend systems, and developer utilities. Focused on secure, maintainable, automated, and reproducible development workflows. Currently developing skills in Linux administration, Docker, REST APIs, CI/CD, automation, backend security, and reliable software systems.

TECHNICAL SKILLS

Core Areas: Linux Systems, Backend Development, DevOps, Cloud Native, Open-Source Software

Development: REST APIs, Backend Automation, CLI Applications, Developer Tools

Engineering: Security, Maintainability, Automation, Reproducibility

Workflow: Git, GitHub, Issues, Pull Requests, Documentation, Release Management

Package Ecosystem: Arch Linux, AUR, Package Maintenance, Version Management

PROFESSIONAL EXPERIENCE

Open Source Maintainer — Bangkah | 2025 – Present

- Develop and maintain open-source projects including ATHA, Bangkah Launcher, NetInfo, and Sentinel AI.
- Build Linux utilities, command-line applications, and developer tools for system administration and software development workflows.
- Maintain software packages within the Arch Linux/AUR ecosystem, including releases, documentation, and version maintenance.
- Build backend automation, REST APIs, and development workflows using Git and GitHub.
- Manage issues, pull requests, documentation, and release cycles through Git-based development workflows.
- Apply security, maintainability, automation, and reproducibility principles throughout the development lifecycle.

SELECTED PROJECTS

ATHA: Open-source application distribution/package management project.

NetInfo: Linux utility for network and system information.

Bangkah Launcher: Open-source developer/system utility project.

Sentinel AI: Open-source project focused on AI and software tooling.

EDUCATION

Politeknik Negeri Lhokseumawe — Informatics Engineering | August 2024 – Present

CERTIFICATIONS

Discovery: Platform Engineer • Introduction to Information Security • Building Gen AI Applications with Microsoft Azure • Learn to Build Web Applications with React • Learn SOLID Programming Principles

PUBLICATION

FACTORY METHOD PATTERN: Analisis Mendalam, Implementasi Java, dan Perspektif Arsitektur Enterprise
